PERSONAL SECURITY AUDIT REPORT

=====

Auditor: Ayman khan
Audit Date: 13-09-2026
Engagement: Personal Digital Security Assessment
Methodology: Scope > Intelligence > Exposure > Severity > Remediation

1. SCOPE

Systems and accounts assessed:

- Primary email: xxxxxx@gmail.com
- Key accounts: Google, Instagram, LinkedIn, Snapchat, Google Pay.
- Primary device: iPhone X, Windows 11.
- Network: home Wi-Fi.

2. EXECUTIVE SUMMARY

The assessment was conducted to evaluate the current security posture of my personal digital accounts, including breach exposure, account sessions, authentication controls, and account-recovery exposure.

Have I Been Pwned returned 0 known breaches for my primary email. The assessment identified weaknesses in two-factor authentication across key accounts and OSINT exposure associated with my email. Remediation actions were identified to strengthen account security and reduce potential account-takeover risk.

3. FINDINGS

CRITICAL

- [x] Primary email (Gmail) had no 2FA enabled at the time of assessment. Compromise of the primary email could increase the risk to other accounts that use it for password recovery.

HIGH

- [x] Instagram had no 2FA enabled at the time of assessment.
- [x] Snapchat had no 2FA enabled at the time of assessment.
- [x] LinkedIn had no 2FA enabled at the time of assessment.

MEDIUM

- [x] Epieos identified a Google profile associated with my primary email and returned matches for Adobe, Dailymotion, and Spotify.

LOW

[] No significant low-severity security findings identified.

POSITIVE SECURITY OBSERVATIONS

[x] Primary email returned 0 known breaches on
Have I Been Pwned.

[x] No unrecognised devices or active sessions were identified.

4. ACTIONS TAKEN DURING AUDIT

[] Enabled 2FA on primary email.

5. REMEDIATION PLAN

This week:

- [] Enable 2FA on my primary Google/Gmail account
- [] Enable 2FA on my Instagram account
- [] Enable 2FA on my Snapchat account
- [] Enable 2FA on my LinkedIn account

This month:

- [] Review and strengthen passwords across key accounts
- [] Review account recovery options and remove unnecessary
or outdated recovery methods
